THE REAL COST.—In a recent political speech, Richard O'Gorman, Esq., declared that the Freedmen's Bureau cost the country annually \$30,000,000, and that there was a standing army in the South, numbering fifty thousand men, costing annually \$100,000,000.

On the same subject, the Hon. Thos. D. Elliot, of New Bedford, in a recent speech delivered in Massachusetts, declared that the Freedmen's Bureau cost the country annually \$30,000,000, and that there was a standing army in the South, numbering fifty thousand men, costing annually \$100,000,000.

With regard to the number of troops employed in the South, an official statement from the headquarters of the army at Washington shows that on the 1st of January, 1868, there were 18,731 soldiers on duty in all the Southern States. From these should be deducted 2,723 engaged against the Indians exclusively, and 2,412 guarding the seacoast forts, and who would be retained there if there were no reconstruction laws to be enforced. This leaves 13,596 as the entire force required in the ten States which attempted to secede. The average cost per man of the army for the year ending June 30, 1868, is, as nearly as can be ascertained, 1,057.76, including officers; so that the actual cost of the forces required in the States in question, instead of being a hundred millions of dollars, as stated by Mr. O'Gorman, is really less than fourteen millions and a half.—N. Y. Sun.

## GREAT IMPROVEMENT IN DENTISTRY.

The attention of the public is called to a great discovery in Dentistry.

## THE GREATEST ADVANCE STEP EVER

MADE IN THE ART.

The main difficulty in wearing artificial teeth is, they do not hold in their place firmly enough, and do to this the annoyance of food getting under the plate while eating. I have discovered a method of so constructing the plate on which the teeth are set that they will not start or drop while eating or speaking, neither will any particles of food get under the plate, no matter what the condition of the mouth is, which is not true of any method hitherto used.

I have secured Letters Patent for the United States, England and France.

The improvement is not in material, but in the construction, which secures the atmospheric pressure on the entire plate.

I have sold the exclusive of said improvement to Dr. L. Gilman, to wit, the Counties of Franklin, Washington, Chittenden, Lamoille and Grand Isle. Those wishing to avail themselves of this improvement, will call on
